

# Our Flexible Isolators

## Material - CSP PharmaFlex® PU (Polyurethane)

CSP's PharmaFlex PU has been developed in conjunction with our new range of Pharamaflex film. This film is extremally popular amongst pharmaceutical manufactures globally. The transparent film is our most commonly used film for flexible isolators. CSP Pharamaflex PU has many features that make this unique film an attractive choice for our customers, some include :

- Highly transparent material
- Anti - static material
- Shelf life of 5 years
- EU food compliant material
- FDA food compliant material
- User friendly material
- Very strong material
- High Melting Point
- Very good resistance to acids and bases.
